

Viral Testing Tool

Updated Dec. 6, 2021

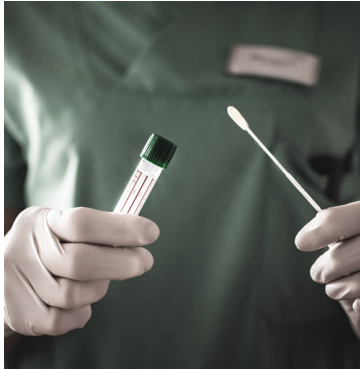

As of **12:01AM ET on June 12, 2022**, CDC will no longer require air passengers traveling from a foreign country to the United States to show a negative COVID-19 viral test or documentation of recovery from COVID-19 before they board their flight. For more information, see [Rescission: Requirement for Negative Pre-Departure COVID-19 Test Result or Documentation of Recovery from COVID-19 for all Airline or Other Aircraft Passengers Arriving into the United States from Any Foreign Country](#).

The COVID-19 Viral Testing Tool is an interactive web tool designed to help both healthcare providers and individuals understand COVID-19 testing options. This tool provides relevant, actionable information for people to make informed decisions about which test they may need. Once you have a test result, the tool will walk you through CDC recommendations for that test result.

This online, mobile-friendly tool asks a series of questions, and provides recommended actions and resources based on the user’s responses.

Viral Testing Tool

Learn when you should get tested for COVID-19, how you can find tests, and what your test result means.
